

OFFICIAL CHECKLIST OF TRINIDAD & TOBAGO

The official list of species of Trinidad & Tobago stands at 474 as of January 2014. This list is updated periodically to reflect additions brought about by the significant increase in coverage by both local and visiting birdwatchers to our islands.

This list comprises two components:

- (a) species adjudged as correctly identified by the Trinidad & Tobago Rare Birds Committee since September 1995 that occur naturally or have a sustainable breeding population in Trinidad & Tobago and
- (b) species adjudged acceptable by Richard French prior to the TTRBC's inauguration.

Names and order of species follows that of the American Ornithologists' Union (AOU) and their South American Checklist Committee (SACC), current as of April 2012
